

# PROBLEMATIC USES OF ICT AMONG YOUNG PEOPLE IN THEIR PERSONAL AND SCHOOL LIFE

Dr. David Rodríguez-Gómez, Dr. Diego Castro y Dr. Julio Meneses

<https://doi.org/10.3916/C56-2018-09>

## INTRODUCTION

### Disadvantages TIC

The use of ICT implies risks for adolescents, since they have to face unknown experiences.

### Benefits TIC

Contribute to the learning process, improving motivation, compromise and students' results.

## METHODOLOY AND RESULTS

The objective of this study is provide an analisis of problematic uses of ICT among adolescents in their personal and school life.

Univariate and bivariate analysis

1.052 young people of between 12 and 18 years

3 Poisson regression models

The probability of problematic use increases among the olders.

Greatest use of "smartphones" is a key factor of problematic uses.

Superior problematic use among males

## CONCLUSIONS

The problematic uses use to be related to learning proceses and relationships in classrooms.

Those with a greater access to the Internet use to show developed digital competences.

Need to encourage responsible uses of technology in all contexts: familiar, school and social life.
