

# CONTRIBUTIONS OF FUTURES STUDIES TO EDUCATION: A SYSTEMATIC REVIEW

Dr. David Menéndez-Alvarez-Hevia, Dr. Santos Urbina-Ramírez, Dra. Dolors Forteza-Forteza and Dr. Alejandro Rodríguez-Martín

<https://doi.org/10.3916/C73-2022-01>

## Future studies

offers a framework of ideas and dispositions that allows us to develop more productive images of the future and forms of working with it

## INTRODUCTION

Despite several efforts to translate this approach to different educational contexts, it is still a field under development.

In essence, all education is about the future

## OBJECTS AND METHODS

The main objective of this article is to expose and discuss the latest international academic developments and contributions of futures studies to education.

Systematic review of literature

PRISMA

Web of Science and Scopus Articles published between 2012 and 2022 (N=50)

## CONCLUSIONS

The predictive approach and negative perspectives are not present.

Futures studies contribute to change the way of working with and conceptualising the future in education.

Futures literacy is a key element to bring together ideas related to futures studies to education.

**FUTURE**
